

Deliver world-class enterprise applications faster.

**macrix**  
TECHNOLOGY GROUP

Streamline Industrial Application Development & Integration

Dozens of services, diverse interfaces, constant updates in your industrial systems? ArconQ makes it simple:

**build / deploy / manage**

modular, microservice-based applications faster and more reliably.

## Focus on Your Core Business Logic, Not Technological Challenges

ArconQ provides a robust foundation for your applications, abstracting away aspects like service communication, deployment and operations.

Let ArconQ do the heavy lifting, so your team can focus on what truly drives value: your business logic and innovation.

# Key Benefits for your Business:

## Faster Development

Accelerate your development cycle with built-in communication, message handling, deployment and resilience patterns.

## Scalable & Resilient Systems

Microservice architecture with Kubernetes orchestration ensures reliable performance at scale - with auto-recovery built-in.

## Plug & Play Integration

Connect legacy or new applications via our SDK with minimal changes - .NET and other platforms supported.

## Clear System Overview

Centralized monitoring with Elasticsearch & Kibana offers deep visibility, fast diagnostics, and clear performance insights.

## One-click Deployment & Rollbacks

Deploy and manage microservices confidently. Run multiple application versions in parallel with rollback support.

## Integrated HMIs

Applications can host custom user interfaces (e.g., Blazor, React) directly inside the ArconQ ecosystem.

# Core Capabilities:

## Microservice Architecture

Build systems from small, independent, and easily manageable services.

## Kubernetes-Native Operation

Leverage the power of Kubernetes for orchestration, scalability, and self-healing.

## Visual Communication Designer

Intuitively define and manage data flows between applications.

## Central Application Management

Monitor and control all deployed apps and instances from a single, unified interface.

## Robust Logging & Monitoring

Elasticsearch and Kibana integration for real-time operational insight.

## Developer-Friendly SDK

Simplifies the process of making applications ArconQ-compatible.

# Empower Your Industrial Solutions

ArconQ is engineered for complex industrial environments where diverse software components must work together seamlessly. By reducing development and operational complexity, ArconQ enables you to build **robust, scalable, and future-ready** applications with greater speed and reliability.

## Deliver world-class enterprise applications faster than ever before:

Focus on features, not software challenges. Get in touch and discover how ArconQ can help deliver your projects faster.
